## MEDICAL STORE MANAGEMENT SYSTEM| JAVA | | LINK

Java

Medical store management system is a java project that maintains the pharmacy records. The whole system is

made in NetBeans IDE. The system has a MySQL database as back-end support. The system supports all the

features that are required here in this system.

## TYPING SPEED TEST APP | PYTHON | | LINK

Python

Typing Speed Test app is useful to test/measure the typing speed of a user.

## SUPER HERO HUNTER | VANILLA JS| | LINK

Vanilla Javascript, HTML, CSS, Marvel Api

This project is Super HeroHunter App in which we use superheroAPI() to fetch the records and details of allthe

superheroes along with some additional features

This project demonstrates API handling using vanilla js.

## FUNCTION GENERATOR USING ICL 8038

Function Generator is a device that can produce various types of waveform as its output signal.

The common waveform generated by this device are sine wave, square wave, triangular wave and

sawtooth wave.

## AUTOMATED GUI-BASED OHM'S LAW VALIDATOR

This software automatically builds some basic circuit logic to prove Ohm's law.

The GUI software validates all the data and makes sure that the actual circuit should have better configuration.

## AUTHENTICATIONNODEJS|AUTHENTICATIONTEMPLATEAPP| | LINK Node.js, Express.js, MongoDB, HTML &CSS, javascript, EJS,Noty.js, Passport.js, CSS,Railway

This application contains a manual login/signup feature.

This application contains google oAuth2 login/signup

Update your password by getting a link to your Gmail account.

Created by using complete MVC architecture.

Can be used in any project as a starter.(Just need to make some minor changes in env).

## CERTIFICATIONS

- Back End | Full Stack Web Development in Node.js - CODING NINJAS
